

IMAGINATION G

5 Signals You're Drifting Instead of Moving

A quick diagnostic to spot momentum killers in your project, business, or team.

1. Meetings Multiply, Outcomes Disappear

If your calendar is full but your checklist is empty...

â You're drifting.

2. You're Collecting Insights, Not Decisions

Endless reports, no clear next steps?

â You're in data fog, not movement.

3. Everything Feels 'Almost Ready'... Forever

Perfection is the enemy of momentum.

â You're polishing, not pushing.

4. Your Team Asks for Permission, Not Accountability

When people wait for directives instead of making moves...

â You're managing, not mobilizing.

5. Your Energy is Scattered Across Too Many 'Nice to Haves'

Busyness â progress.

â You're stuck in noise, not clarity.

IMAGINATION G's Rule of Thumb:

â Movement beats management.

â Clarity kills drift.

â Build rhythm, not rigidity.
